***** EXAMINATION *****

GEOPHYSICAL EXPLORATION FOR ENGINEERING & ENVIRONMENTAL INVESTIGATIONS

1. **A geophysical survey has this objective:**
 - a) Measurement of geologic features.
 - b) The in situ determination of engineering properties.
 - c) The detection of hidden cultural features.
 - d) All of the above.

2. **Geologic features include:**
 - a) faults.
 - b) bedrock lows
 - c) discontinuities and voids.
 - d) All of the above.

3. **Engineering properties that can be determined in situ include:**
 - a) elastic modulus
 - b) electrical resistivity
 - c) both a and b
 - d) neither a nor b

4. **Hidden cultural features for geophysical detection include:**
 - a) buried underground tanks and pipes
 - b) lakes
 - c) swamps
 - d) ponds

5. **Inverse resolutions provide:**
 - a) unique conclusions
 - b) a most likely solution selected from numerous possibilities.
 - c) both a and b
 - d) neither a nor b.

6. **Forward solutions:**
 - a) proceed from cause to effect.
 - b) are not a unique determination.
 - c) both a and b
 - d) neither a nor b.

7. **Preparation of geophysical models almost always assume:**
- a) earth materials have distinct subsurface boundaries.
 - b) a material is non-homogeneous.
 - c) the unit is non-isotropic.
 - d) All of the above.
8. **Geophysical measurements are:**
- a) always accurate.
 - b) very precise.
 - c) both a and b
 - d) neither a nor b
9. **Geophysical methods can be classified as:**
- a) active techniques
 - b) passive techniques
 - c) both a and b
 - d) neither a nor b
10. **What process type throughout geophysical investigations is interpretation?**
- a) abrupt
 - b) parabolic
 - c) non-continuous
 - d) continuous.
11. **Implementation of a geophysical model fit only the:**
- a) widest definition of interpretation.
 - b) narrowest definition of interpretation.
 - c) require a minimum of ground truthing.
 - d) None of the above.
12. **Correlation of the geophysical model with available ground truth:**
- a) can be a laborious interpretative process
 - b) is a relatively easy process.
 - c) is not used for the final product.
 - d) All of the above.
13. **Airborne geophysics is:**
- a) more detailed than surface procedures
 - b) less detailed than surface procedures
 - c) has the advantage of rapid coverage without surface contact.
 - d) both b and c.

14. **Geophysical field crews productivity is affected by:**
- a) weather
 - b) terrain
 - c) vegetation
 - d) All of the above.
15. **The geophysicist site information include:**
- a) payroll cost
 - b) maintenance costs
 - c) site geology
 - d) None of the above.
16. **Geophysical contracts are:**
- a) line-mile
 - b) per-station
 - c) lump-sum
 - d) Any of the above
17. **A interdisciplinary team for geophysical projects is necessary because:**
- a) Geophysicists are adept in all facets of their field.
 - b) Geophysical exploration is highly specialized.
 - c) Both a and b.
 - d) Neither a nor b.
18. **The stated objective of a geophysical project is the responsibility of:**
- a) the project manager
 - b) the engineer.
 - c) the geophysicist.
 - d) None of the above.
19. **Early exploration in the geophysical sequence allows verification of:**
- a) surveying.
 - b) soil tests
 - c) geology
 - d) None of the above.
20. **The major class of seismic waves is:**
- a) Body waves
 - b) Surface waves
 - c) Both a and b
 - d) None of the above

Return this page with your answer sheet and a check or money order for \$100 per course. Use one check for each registrant (in your company) taking one or more courses. We accept company checks (if they are your employer's). We do not accept third-party checks or checks outside of your city of residence. Using third-party checks that do not include your name or company name may invalidate your professional development hours being reviewed by an audit process. Add \$5 for same day processing and priority shipping.

Make checks or money orders payable to Geographic Information Systems.
